

Edition of videos

SEE THE GOAL decided to use the freeware Davinci Resolve 12.5, by Blackmagic

<https://www.blackmagicdesign.com/products/davinciresolve>

TECHNICAL REQUIREMENTS TO HARDWARE

The following recommendations refer to the project partners trial run of editing videos, March 2017. A bit less capacity is possible, this is the optimal solution.

The editorial software to be used is Davinci Resolve.

- Strong processor. Min. Dual-core, preferably Quad-core
- Min. 8GB RAM. Preferably 16GB RAM.
- Strong modern graphic card, min. 1GB RAM
- Fast harddisk - min. 7200rpm HDD. Preferably a SSD. Min. 50GB free space after installation of Resolve.
- Screen with min. 1920x1080 resolution.
- Updated steering system.

TUTORIALS

Basic functionalities:

<https://youtu.be/PgTRPXsgv-I?t=1m33s>

The first 13 min. give a good basic understanding of how to edit in Resolve. After that it gets more advanced and not relevant for the training on the level needed.

Blackmagic (the producer) has also made a good tutorial. This is more suitable for people with an advanced background in video edition.
